DETAILED ACTION

Allowable Subject Matter

1. Claims 2, 4-19, 21 and 23 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 2 recites an electronic device test apparatus for testing DUT's by pushing their input/output terminals against contact units of a test head, comprising a calculating device configured to calculate the position and posture of the outside shape of the front surface of the DUT before being picked up by the moving device and the position and posture of the input/output terminals of the DUT before being picked up by the moving device from image information captured by the first imaging device, calculate the position and posture of the outside shape of the back surface of the DUT after being picked up by the moving device from image information captured by the second imaging device, and calculate the position and posture of the input/output terminals of the DUT after being picked up by the moving device based on the results of these calculations, in combination with other elements of the claim. Since claims 5-19 depend from claim 2, they are also allowed.

Claims 4 recites an electronic device test apparatus for testing DUT's by pushing their input/output terminals against contact units of a test head, comprising a calculating device configured to calculate the position and posture of the input/output terminals of the DUT before being picked up by the moving device from the image

information captured by the first imaging device, calculate the position and posture of the outside shape of the back surface of the DUT before being picked up by the moving device from the image information captured by the third imaging device, calculate the position and posture of the outside shape of the back surface of the DUT picked up by the moving device from the image information captured by the second imaging device, and calculate the position and posture of the input/output terminals of the DUT picked up by the moving device based on the results of these calculations, in combination with other elements of the claim.

Claim 21 recites a method of testing DUT's by pushing their input/output terminals against contact units of a test head, comprising calculating the position and posture of the outside shape of the front surface of the DUT before being picked up by the moving device and the position and posture of the input/output terminals of the DUT before being picked up by the moving device from the first image; calculating the position and posture of the outside shape of the back surface of the DUT after being picked up by the moving device from the second image; and calculating the position and posture of the input/output terminals of the DUT after being picked up by the moving device based on the results of these calculations, in combination with other elements of the claim.

Claim 23 recites a method of testing DUT's by pushing their input/output terminals against contact units of a test head, comprising calculating the position and posture of the input/output terminals of the DUT before being picked up by the moving device from the first; calculating the position and posture of the outside shape of the

back surface of the DUT before being picked up by the moving device from the seeong-third image; calculating the position and posture of the outside shape of the back surface of the DUT picked up by the moving device from the t-hit-g-second image; and calculating the position and posture of the input/output terminals of the DUT picked up by the moving device based on the results of these calculations, in combination with other elements of the claim.

These features taken alone or in combination are neither disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
